

Abstract

Speaker:	Victoria Cupet
Company:	International Institute of Business Analysis (IIBA)
Position:	Regional Director EMEA
Email:	Victoria.cupet@iiba.org
Presentation title:	Requirements in uncertain times
Slot:	Workshop Stream II, 14:00-15:10
Abstract:	<p>Requirements are the key elements for any change! Well-written requirements contribute to project success. In uncertain times having stable requirements became a challenging task.</p> <p>Requirements format depends on the industry's best practices, organizational standards, and project needs. Predictive approaches need a complete set of requirements approved before the execution phase. Adaptive methodologies focus on "just-in-time" and "just enough" approaches.</p> <p>During this workshop, you will learn requirements management best practices for uncertain times.</p>
Main topics:	<ul style="list-style-type: none"> > Predictive vs adaptive approaches in projects > Requirements management process in uncertain times > Theory versus practice
